

**Shortened Study Title:** Effects of patient guided self-reflection on their illness, on the success of recruitment to a clinical trial.

**Full Study Title:** Does patients' guided self-reflection on their illness increase engagement with and recruitment to clinical trials: a mixed-methods study within a trial (SWAT).

**Patient ID:**

**Date Questionnaire Completed:** DD/MM/YYYY \_\_\_\_\_

**Age (in years):** \_\_\_\_\_

**Sex (please circle):**      Male                      Female                      Other (please state)                      Rather not state

**Section 1 – Background- Understanding of clinical trial concepts. Please circle one answer for each question.**

**1. How fully would you describe your understanding of "Clinical Trials"?**

Excellent              Very Good              Good              Fair              Poor

**2. How fully would you describe your understanding of "Informed Consent"?**

Excellent              Very Good              Good              Fair              Poor

**3. How fully would you describe your understanding of "Randomisation"?**

Excellent              Very Good              Good              Fair              Poor

**4. How fully would you describe your understanding of the "risks" of participating in a clinical trial?**

Excellent              Very Good              Good              Fair              Poor

**5. How fully would you describe your understanding of the "benefits" of participating in a clinical trial?**

Excellent              Very Good              Good              Fair              Poor

**6. How fully would you describe your understanding of your "right to withdraw" from a clinical trial?**

Excellent              Very Good              Good              Fair              Poor

## Section 2 – Participation in a clinical trial

**7. How important do you believe participation is in clinical trials? Please circle**

Extremely important    Very important    Moderately important    Of little importance

**8. I am confident in my own abilities to make the decision to consent to participate, or not in a clinical trial without any input from my doctor or other health professional. Please circle**

Strongly Agree    Agree    Neither agree nor disagree    Disagree    Strongly Disagree

**9. How likely would you be to consent to participate in a clinical trial? Please circle**

Very Likely    Likely    Not likely    Very Unlikely

**If you answered “Very likely” or “Likely” to Question 9 can you list your top 2 reasons for consenting in order of importance**

1. \_\_\_\_\_
2. \_\_\_\_\_

**If you answered “Not likely” or “Very Unlikely” to Question 9 can you list your top 2 reasons for not participating in order of importance?**

1. \_\_\_\_\_
2. \_\_\_\_\_

**10. I would like to receive more information on clinical trial participation. Please circle**

Strongly Agree    Agree    Neither agree nor disagree    Disagree    Strongly Disagree

## Section 3 -Patient self-reflection on their condition

**11. How fully would you describe your understanding of your medical condition. Please circle**

Excellent    Very Good    Good    Fair    Poor

**12. Thinking about the condition you have, does this impact on your health (physical health/mental health)? Please circle**

Yes      No

If answered "Yes" can you list the top 2 ways in which your condition has impacted your health.

1. \_\_\_\_\_
2. \_\_\_\_\_

**13. Does your condition impact your quality of life? Please circle**

Yes                  No

If answered "Yes" can you list the top 2 ways as to how your condition has impacted your day-to-day living

1. \_\_\_\_\_
2. \_\_\_\_\_

**14. Do you believe that the current treatments for your condition are adequate? Please circle**

Yes                  No

**Please list reasons for your answer above**

---

---

---

**15. Do you believe that medical research is focused well enough on your condition? Please circle**

Yes                  No

**16. My condition causes me to have additional concerns regarding clinical trial participation. Please circle**

Strongly Agree      Agree      Neither agree nor disagree      Disagree      Strongly Disagree

If you answered “Agree” or “Strongly Agree” to Question can you list your top 2 concerns in order of importance.

1. \_\_\_\_\_
2. \_\_\_\_\_

**17. With your condition how likely would you be to participate in a clinical trial? Please circle**

Very Likely      Likely      Not Likely      Very Unlikely

**18. How likely would you be to recommend clinical trial participation to other members of the public? Please circle**

Very Likely      Likely      Not Likely      Very Unlikely

**Section 4 – Assessment of and benefits of the one-to-one patient consultation (Active SWAT group only)**

**19. I found the self-reflection to be beneficial when making the decision to consent to participate, or not in a clinical trial. Please circle**

Strongly Disagree      Disagree      Neither agree nor disagree      Agree      Strongly Agree

If you answered “Agree” or “Strongly Agree” to Question 25 can you list two reasons why you found the self-reflection to be beneficial when deciding to consent to participate in a clinical trial.

1. \_\_\_\_\_
2. \_\_\_\_\_

If you answered “Disagree” or “Strongly Disagree” to Question 25 can you list two reasons why you found the self-flection not to be beneficial when deciding to consent to participate in a clinical trial.

1. \_\_\_\_\_
2. \_\_\_\_\_

**20. The self-reflection has helped me to gain a better understanding of my condition and its impact on my health (both physical and mental) Please circle**

Strongly Agree    Agree    Neither agree nor disagree    Disagree    Strongly Disagree

**21. The self-reflection has helped me to gain a better understanding of my condition and if my condition would be suitable for clinical trial participation. Please circle**

Strongly Agree    Agree    Neither agree nor disagree    Disagree    Strongly Disagree

**22. The self-reflection has improved my knowledge on how clinical trials may have an impact on my condition. Please circle**

Strongly Agree    Agree    Neither agree nor disagree    Disagree    Strongly Disagree

**23. One-to-one patient consultations on illness self-reflection should be conducted with all patients going forward when recruiting patients for clinical trials. Please circle**

Yes                      No

**Please list some reasons for your answer above**
